Feedback for real-users evaluation

Feedback of User1:

Task.1 Testing the basic functionality of the website
1. Yes, the buttons on the website is very clear and it is easier to find which buttons is for return to last page, close the website and log out etc.
2. Yes, the colour actually is match to the color of UofG and the size of the font looks very comfortable.
3. Yes, the basic functions of the website is complete since I could easily log in and log out to my account and also it is clear to find the location of particular catering. And I could click 'love' to add the dishes to 'My Favorite' list.

Task. 2 Testing calorie-related functions
1. It's on my account. I could add dishes from the given list to my calories record and it is a fantastic function for the website.
2. Yes, all provided calorie-related features are fine for me to record my data of calories. But it would be nice to have a reminder when people intaking excessive calories.
3. Yes, I could easily and clearly to see my record of daily and weekly calorie.

Task. 3 Test the comments function
1. Yes, it is on the buttom of food page and I can see all comments from my alumnus. It is amazing for me to know how other people think about some dishes.
2. Yes, I could distinguish them by looking the name under their profile photo.
3. Yes, the comments are very fine.

Task. 4 Test the 'nutrition' discussion
1. Yes, it is very easier to find the nutritionist tips.
2. It is a little bit general and not suitable for my healthy condition.
3. Yes, the replies of nutritionist is located on the right side and the student's is on the left side.

Feedback of User2:

Task. 1 Testing the basic functionality of the website
1. Yes, all the buttons are obvious to find and click.
2. The color of the page and the font look very comfortable, color and font very fit, look very consistent, coherent.
3. Yes, the basic functions are complete, map location will show after clicking the location link on page Main-oncampus and Main-lh. There's also an interesting function that shows videos of food being made in the kitchen.

Task. 2 Testing calorie-related functions
1. It could be found on My Account.
2. Yes, it is appropriate because users could know their daily or even weekly calories intake and then do the daily or weekly meal plan by this feature.
3. Users can clearly check their daily and weekly calorie intake. Users can use Your Food Record to calculate daily calories. There's also a chart showing trends in calorie intake over the week.

Task. 3 Test the comments function
1. Yes, it can be found quickly under Food Description.
2. Users can easily distinguish comments between students and staff. Staff comments will show up as staff, and student comments will show their student ID.
3. Yes, not only users can easily distinguish comments between students and staff, but also can see the number of likes per comment.

Task. 4 Test the 'nutrition' discussion
1. It can be found in discussion board of Main page.
2. The nutrition Tips feature helps users understand the nutritional recommendations in addition to the daily and weekly calorie intake.
3. The nutritionist's comments will show his name and profile, and the student's replies will only show his student ID.

Feedback of User3:

Task.1 Test the basic functionality of the website

1. the buttons on the website are easily recognisable
2. the fonts and colours of the web pages are comfortable
3. the basic functionality of the web pages is complete and well structured

Task. 2 Test the functions related to calories

1. the user interface shows the change in calories by means of a line graph. 2.
2. Calories for relevant dishes can be freely added and deleted, but not for customised dishes.
3. The daily and weekly calorie intake is displayed separately at a glance.

Tasks. 3 Testing the reviews function

1. The dish review section can be found quickly.
2. Easy to distinguish between staff and students.
3. The comment box is clear.

Task. 4 Testing the "Nutrition" discussion

1. Tips from nutritionists can be found on the website.
2. A clear place to learn about dietary nutrition.
3. there is a clear distinction between dieticians and students.

Feedback of User4:

Task 1. Testing the basic functionality of the website

1. Yes, I can find corresponding buttons for each function easily.
2. Yes, the colour of the website is clear and easy to read, and font is in right size
3. Yes, the basic functions are available

Task 2. Testing calorie-related functions

1. I can find the button that used to add dishes, it is in the My Account page. But it will be better to also add a button at the dish page so that it will be easier for the user to add them.
2. Yes, the graphs are easy to read
3. I cannot find the difference of this question with the question 2 of Task 2

Task 3. Test the comments section is set up in obvious module

1. Yes, the comments section is set up clearly
2. The website using GUID for users of students so it is obvious for find staff among many users, because they use their own name or just the name of 'staff'
3. It would be better if it allows the user or staff to reply to a specific comment.

Task 4. Test the 'nutrition' discussion

1. Yes, the post is write in a separate area which is easy to find
2. Yes, it is useful for me.
3. Yes, they can distinguish it.
